Ocean A huge body of salt water. Oceans cover nearly 71% of the Earth's surface Captain Someone who is in charge of a team. Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on		seven continents.
Ocean A huge body of salt water. Oceans cover nearly 71% of the Earth's surface Captain Someone who is in charge of a team. Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on	Vouage	To travel somewhere far on
Captain Someone who is in charge of a team. Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on		a boat
Captain Someone who is in charge of a team. Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on	Ocean	A huge body of salt water.
Captain Someone who is in charge of a team. Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on		Oceans cover nearly 71% of
Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on		the Earth's surface
Explorer Someone who travels in search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on	Captain	Someone who is in charge
search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on		of a team.
search of information to tell people about. Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on	Explorer	Someone who travels in
Endeavour Doing something that is very difficult or ambitious Earth Earth is what we live on		search of information to tell
difficult or ambitious Earth is what we live on		people about.
Earth is what we live on	Endeavour	Doing something that is very
Earth is what we live on and is the only planet that		difficult or ambitious
and is the only planet that	Earth	Earth is what we live on
		and is the only planet that
can support life		can support life

HMS Endeavour

What is an explorer?

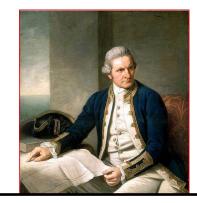

In geography and history this term we will be doing an in depth study of Captain James Cook.

Where was he born?

James Cook was born in 1728 in Marton, Yorkshire, England. When he was about 18 years old he travelled to Whitby and got a job working on the coal ships.

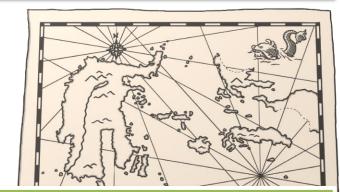

What did he do?

He became Captain of a ship called the HMS Endeavour. Captain Cook went on three voyages in his time as an explorer trying to be the first person to ever reach the Antarctic. The third voyage was Cook's last, they went to Hawaii but were involved in a fight and Cook died in 1779 aged 55.

Captain James Cook

Antarctic

Fascinating Fact

He is considered one of the world's greatest explorers and created the first accurate map of the Pacific Ocean.
